# RACIAL HEALTH EQUITY IN SOCIAL CARE

2022 National Research Meeting

Creating sustainable infrastructure to support cancer survivors by identifying and addressing social risk factors and reducing health inequities

# Day 2: Creating sustainable infrastructure to support cancer survivors by identifying and addressing social risk factors and reducing health inequities

**Hannah Arem**

**Lisa Simms Booth**

**Oluwabukola Oluwole**

**Tallulah Anderson**

**Jacqueline Beale**

# Agreements for a safe and brave meeting

Practice active, judgement-free, and empathetic listening

Respect each other's differences and backgrounds

Agree to disagree – but seek understanding. We are here to learn!

Honor the difference between unsafe and uncomfortable

Be curious about intentions but recognize that impact is more important than intentions

Welcome being called in as a gift and an invitation to learn

Be mindful of positionality and power dynamics

Acknowledge judgments and assumptions (including our own – we all have biases)

Use inclusive language and avoid using derogatory or stigmatizing language

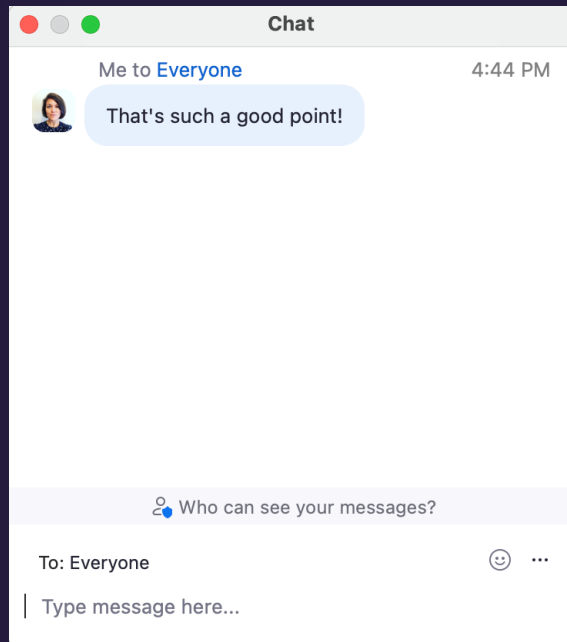

Release control, privilege, and notions of being right

Accept that things may remain unresolved; we might not feel a sense of closure

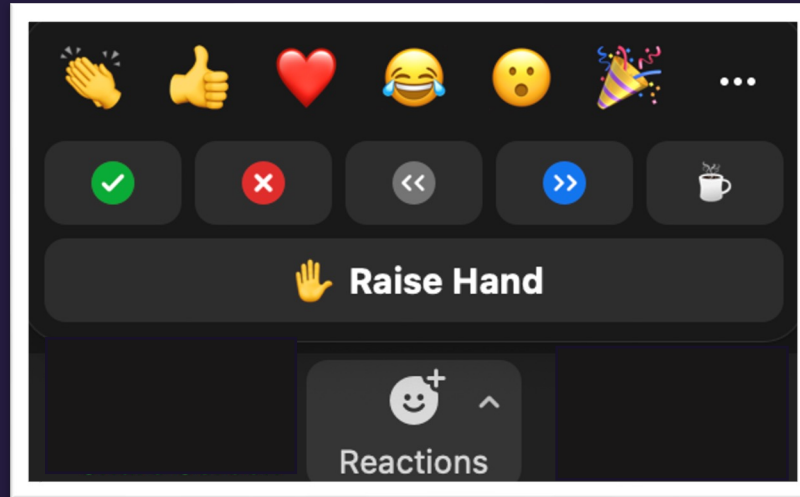

**Reminder: This session is being recorded. Recordings and slides will be available after the meeting.**

# 3 Ways to Engage in the Room

## 1. Chat Window

## 2. Emoji Reactions

## 3. Audio and Video

(We encourage you to keep your camera on during the session)

...and on Twitter!

#SIRENRacialEquity

@SIREN\_UCSF

# Project goals

- To improve cancer survivor health and well being through addressing structural inequities and racism
  - Improve clinical-community linkages
  - Employ Community Health Workers to facilitate connections between healthcare settings and community supports
  - Deliver anti-racism training within and across healthcare settings

## R4P: A Health Equity Framework for Research Planning and Evaluation in African American Populations

- **Remove:** Intentionally looking for where racism can show up in the research design or intervention
- **Repair:** Consider the past injustices and trauma caused by research with the target audience to repair the damage done to university/community partnership and regain trust by community members in research
- **Restructure:** Analyzing the research and PAB structures to assess how to restructure policies, expectations, or traditions that will further marginalize historically excluded groups
- **Remediate:** Lowering the inconveniences or risks associated with research structures and processes
- **Provide:** Providing capability building and/or resources in ways that are accessible and equitable

Hogan et al. Dimensionality and R4P. Maternal and Child Health Journal (2018) 22: 147-153.

# Thanks to funders and the study team

**Funder: This research initiative is fully supported by the Division of Cancer Prevention and Control at the Centers for Disease Control and Prevention under cooperative agreement award U01DP006639. The findings and conclusions in this report are those of the authors and do not necessarily represent the official position of the Centers for Disease Control and Prevention.**
